For immediate release

4 May 2010

Clean Air Power Ltd

("Clean Air Power" or "the Company")

New Agreement

Clean Air Power (AIM: CAP), the developer of Dual-Fuel™ combustion technology that enables heavy-duty diesel engines to operate on a combination of diesel and natural gas, today announces that it has received a purchase order from a leading global manufacturer of construction equipment to develop a Dual-Fuel Snow-Blower demonstrator to be delivered to Stockholm airport, Sweden.

Under the terms of the agreement, Clean Air Power will convert two 9 litre engines using its patented Dual-Fuel™ combustion technology with the purpose of demonstrating the efficiency and cost saving capabilities that its technology offers end users. To this effect, the target is to reach a 50% substitution level, which is the measure of energy substituted by gas. Once converted, the vehicle must also demonstrate drivability and robustness. The demonstration is due to be completed by May 2011.

Commenting on the agreement with, John Pettitt, CEO of Clean Air Power said:

"We are delighted to have entered this new agreement as it is yet another endorsement of Clean Air Power's technology. It also highlights the wide range of vehicles and products that can be enhanced through the integration of our Dual-Fuel™ combustion technology and we hope that this demonstration will successfully lead to potential new opportunities."
